產品設計師

End-to-end 產品設計，聚焦設計系統、複雜互動拆解與跨平台一致性。曾在企業級影像分析平台與 Web3 投資平台建立 component library 與設計系統，並在 white-label 模式下支援多個產品上線。

工作經歷

Impossible Finance

遠端

Oct, 2021 - Jul, 2025

產品設計師

- Design system × white-label 規模化：建立 IDO 投資平台的 Dark/Light dual-mode 設計系統與 Figma component library；同套系統延伸成 white-label 方案，多個合作客戶用它推出自家加密資產產品
- CMS 後台架構設計：拆解既有代幣上架流程，重新整合並設計 CMS 整體架構，把產品部署從數日縮到數小時，支撐 20+ 次資產發行
- End-to-end 核心流程設計：從 user flow、wireframe 到高保真 prototype，完整負責 wallet connect、KYC、跨鏈質押、Token Minting、Node Sale 等使用者旅程
- TGBallers @ TOKEN2049 Singapore：72 小時內完成 TON 鏈上遊戲設計與視覺交付，整合 ChatGPT、Midjourney、Freepik 加速產出

大猩猩科技

台北, 台灣

Jun, 2017 - May, 2020

UI/UX 設計師

- IVAR 智慧影像分析平台：end-to-end desktop 流程設計，從 site map、wireframe 到高保真 prototype；產出 dashboard、即時告警、影像查詢工作流程，實際部署於海外監獄、捷運站月台監控等公部門場景，協助操作者在大量影像中快速定位關鍵事件
- IVAR 設計系統與前端實作：導入 Material-UI 與 Highcharts 規範建立 IVAR component library；主動撰寫 production HTML/CSS 直接上線，縮短設計到開發的循環
- 智慧機場 AI 整合系統設計：將 access 管理、考照 e-learning、車牌辨識等多個 AI 模組整合進同一套系統

台灣大哥大

台北, 台灣

Oct, 2013 - Jun, 2017

UI/UX 設計師

- myVideo OTT 多平台設計：參與 mobile app 與多平台原型設計；在 Chromecast 推出後快速完成 myVideo 端的串流整合，把跨裝置內容體驗串起來
- 使用者易用性測試：與奧美 (Ogilvy) 合作，針對其輸出的 wireframe 在 myVideo 端執行易用性測試，依結果回頭優化設計

個人專案

Otterly

Mobile Product · AI Workflow

2026 – Present

試用：[\[t.me/otterly_dev_bot\]](https://t.me/otterly_dev_bot)

- 0 到 1 mobile-first 產品設計：完整負責研究、UX/UI、流程設計與機制規劃，並在 Telegram Mini App 平台上完成 MVP 上線
- AI 輔助工作流：Claude 做可點擊原型、Google Stitch 迭代 UI、ChatGPT × Jitter 做角色與動畫、Claude Code 完成程式實作

專業進修

UX3: User Experience Design Online Course

頒發日期 Feb, 2026

學歷

元智大學

資訊傳播學系碩士 2013

銘傳大學

數位媒體動畫學系學士, 2009

🐦 @niyaXiang

PRODUCT DESIGNER

End-to-end product design focused on design systems, breaking down complex user interactions, and cross-platform consistency. Built component libraries and design systems at an enterprise video analytics platform and a Web3 investment platform, supporting multiple product launches under a white-label model.

PROFESSIONAL EXPERIENCE

Impossible Finance

Remote

Oct, 2021 - Jul, 2025

Product Designer

- Design system × white-label scaling: Built a Dark/Light dual-mode design system and Figma component library for the IDO platform; extended it into a white-label solution used by partner clients to launch crypto asset products.
- CMS backend architecture design: Broke down existing token onboarding workflows and redesigned the entire CMS architecture, cutting product onboarding from days to hours and supporting 20+ asset launches.
- End-to-end core flow design: From user flows and wireframes to high-fidelity prototypes; designed wallet connect, KYC, cross-chain staking, Token Minting, and Node Sale user journeys.
- TGBallers @ TOKEN2049 Singapore: Delivered game design and visuals on TON in 72 hours, integrating ChatGPT, Midjourney, and Freepik to accelerate production.

Gorilla Technology Group Inc.

Taipei, Taiwan

Jun, 2017 - May, 2020

UI/UX Designer

- IVAR smart video analytics platform: End-to-end desktop flow design (site maps to prototypes); delivered dashboards, real-time alerts, and video query workflows deployed for overseas correctional facilities and metro platform surveillance to help operators locate key events quickly.
- IVAR design system & production frontend: Built IVAR's component library on Material-UI and Highcharts standards; wrote production HTML/CSS that shipped to the live product, shortening the design-to-deploy cycle.
- Smart airport AI system design: Integrated access management, restricted-zone certification e-learning, and license plate recognition modules into a single AI system.

Taiwan Mobile Co., Ltd.,

Taipei, Taiwan

Oct, 2013 - Jun, 2017

UI/UX Designer

- myVideo OTT multi-platform design: Contributed to mobile app and multi-platform prototyping; added Chromecast support to myVideo shortly after its launch, connecting the content experience across devices.
- Usability testing with external partner: Ran in-house usability testing on wireframes delivered by Ogilvy, and fed research findings back into design iteration.

PERSONAL PROJECT

Otterly

Mobile Product · AI Workflow

2026 – Present

Demo: [\[t.me/otterly_dev_bot\]](https://t.me/otterly_dev_bot)

- 0-to-1 mobile-first product design: Research, UX/UI, flow design, and mechanics; shipped MVP on Telegram Mini App.
- AI-powered workflow: Claude for clickable prototypes, Google Stitch for UI iteration, ChatGPT × Jitter for character and animation work, Claude Code for implementation.
