PRODUCT DESIGNER | WEB3 · AI WORKFLOW · DESIGN SYSTEM

End-to-end product design across Web3 trading, AI workflows, and design systems. Designed core flows for the IDO investment platform. Hands-on with Claude, Stitch, ChatGPT, and Midjourney throughout delivery.

PROFESSIONAL EXPERIENCE

Impossible Finance

Product Designer

Remote

Oct, 2021 - Jul, 2025

- IDO investment platform: Designed core trading flows (wallet connect, KYC, cross-chain staking, Token Minting, Node Sale). Built a Dark/Light dual-mode design system.
- TGBallers @ TOKEN2049 Singapore: Delivered TON on-chain game visuals in 72 hours. Built with ChatGPT, Midjourney, and Freepik. Showcased at TOKEN2049 Singapore.
- White-label design system: Abstracted the IDO platform into a reusable white-label design system, enabling multiple partner clients to launch their own crypto asset products.
- CMS infrastructure: Cut token onboarding from days to hours through componentized design, supporting 20+ token launches.
- Marketing design workflow optimization: Migrated the workflow from Adobe Illustrator to Figma × Jitter.

Gorilla Technology Group Inc.
