PRODUCT DESIGNER

End-to-end product design across Web3 crypto, Telegram Mini Apps, enterprise systems, and OTT media. From IDO platforms to TON mini apps, hands-on with multi-platform design and on-chain flows.

PROFESSIONAL EXPERIENCE

Impossible Finance

Product Designer

Remote

Oct, 2021 - Jul, 2025

- IDO investment platform design (web + responsive): Designed end-to-end flows (wallet connect, KYC, cross-chain staking, Node Sale, Token Minting) and built a dual-mode (Dark / Light) design system for the platform.
- TGBallers @ TOKEN2049 Singapore: Delivered TON on-chain game design and visuals in 72 hours, integrating ChatGPT, Midjourney, and Freepik to accelerate production; showcased at TOKEN2049 Singapore.
- CMS infrastructure: Cut token onboarding from days to hours, supporting 20+ token launches.
- White-label product line: Abstracted the IDO platform into a reusable white-label solution, enabling multiple partner clients to launch their own crypto asset offerings.
- Marketing design workflow optimization: Migrated the workflow from Adobe Illustrator to Figma × Jitter.

Gorilla Technology Group Inc.

UI / UX Designer

Taipei, Taiwan

Jun, 2017 - May, 2020

- IVAR smart video analytics platform: Designed end-to-end desktop flows, including dashboards, alarm systems, and video query workflows; supported smart airport and government e-learning deployments alongside.
- Cross-product design system: Introduced Material-UI and Highcharts standards and built a shared component library; wrote HTML/CSS to accelerate delivery cycles.

Taiwan Mobile Co., Ltd.,

UI / UX Designer

Taipei, Taiwan

Oct, 2013 - Jun, 2017

- Contributed to myVideo OTT mobile app and multi-platform prototyping and usability research; built a marketing-page and EDM component library to streamline asset production.

PERSONAL PROJECT

Otterly – Breaking Ice on TON

Telegram Mini App on TON · Web3 Social

2026 – Present

Demo: [\[t.me/otterly_dev_bot\]](https://t.me/otterly_dev_bot)

- **End-to-end mobile-first product design** (research, UX/UI, mechanics): Designed Telegram Mini App interactions and shipped MVP with AI-assisted implementation on React/TS, Express, libsql/Turso, and Telegram Mini App SDK.
- **AI-powered workflow**: Claude Code for implementation, Claude for clickable prototypes, Google Stitch for UI iteration, ChatGPT × Jitter for character and animation work.
