

吳明翔

Product Designer

專注把複雜系統變成非技術使用者也能上手的工具。經驗涵蓋 B2B SaaS 平台、資料密集型企業系統與多語系產品。擅長全程設計、設計系統建構、AI 輔助設計流程，以及以研究驗證設計決策。

工作經歷

Impossible Finance

Product Designer

Oct 2021 - Jul 2025

IDO 投資平台全程設計

從開戶、身分驗證到資產管理，設計平台核心交易流程；以 Figma 建構支援多語系與 white-label 客戶的 Web/Mobile 設計系統，含深淺雙色主題。

新 CMS 系統從零建構

拆解需求、設計整體架構，建構全新 CMS 系統，將代幣上架時間從數日縮短為數小時，支撐平台累計 20+ 次代幣發行。

0-to-1 時程壓力下交付

72 小時內完成 TON 鏈上小遊戲的架構規劃與初始設計稿，搭配 ChatGPT、Midjourney、Freepik 等平台加速視覺製作。

Gorilla Technology Group

UI/UX Designer

Jun 2017 - May 2020

設計 IVAR 智慧影像分析平台

桌面端 dashboard、即時告警系統、影像查詢流程，把大量即時資訊整理成可預期、易操作的介面。

導入跨產品設計系統

導入 Material-UI 與 Highcharts 規範、建構共用元件庫，並撰寫 HTML/CSS 加速交付

客製化案件設計

智慧機場、新北市輿情系統等政府客製案件，把通用平台調整成符合各客戶業務需求的介面與流程。

台灣大哥大

UI/UX Designer

Oct 2013 - Jun 2017

myVideo OTT 多平台介面

設計 mobile、web、Chromecast 介面，在不同裝置尺寸與互動模式間維持一致的觀看體驗與設計語言。

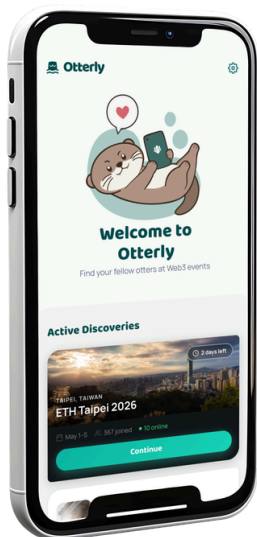

使用者測試與研究

透過 A/B testing 與易用性測試驗證 myVideo 內容版位的設計決策；myBook 期間另協助外部研究團隊進行訪談紀錄。

建立行銷設計規範

從視覺設計原則到 EDM 模板，加速跨部門素材產出。

個人專案

Otterly

Telegram Mini App·Web3 社交產品

0-to-1 mobile-first 產品設計

獨立規劃產品概念、使用者旅程、玩法機制與互動架構，完成 Telegram Mini App 的整體設計。

以 AI 工具加速設計流程

Claude Code 實作 agent 原型、Claude 製作可點擊原型、Google Stitch 迭代 UI、ChatGPT + Jitter 產出角色與動畫

學歷

元智大學

資訊傳播學系碩士, 2013

銘傳大學

數位媒體設計學系學士, 2009

專業進修

UX3: User Experience Design Online Course, 2026

Niya Wu

Product Designer

Product designer who turns complex systems into tools non-technical people can actually use. Worked across B2B SaaS platforms, data-dense enterprise systems, and multi-language products. Hands-on with end-to-end design, design systems, AI-assisted workflows, and research-driven design decisions.

PROFESSIONAL EXPERIENCE

Impossible Finance

Product Designer

Oct 2021 - Jul 2025

🔗 IDO investment platform end-to-end design

From account onboarding and identity verification to asset management, designed the platform's core flows; built a design system across web and mobile, supporting multiple languages and white-label clients, with Dark/Light modes.

🔗 New CMS system from scratch

Broke down requirements one by one and designed the full system architecture, cutting token onboarding from days to hours and supporting 20+ token launches.

🔗 0-to-1 delivery under time pressure

Delivered the architecture plan and design mockups for TGBallers, a TON on-chain game, in 72 hours, with ChatGPT, Midjourney, and Freepik accelerating visual production.

Gorilla Technology Group

UI/UX Designer

Jun 2017 - May 2020

🔗 IVAR smart video analytics platform

Designed desktop dashboards, real-time alarm systems, and video query workflows that organize dense real-time data into predictable, easy-to-operate interfaces.

🔗 Cross-product design system

Introduced Material-UI and Highcharts standards, built a shared component library, and wrote HTML/CSS to accelerate delivery.

🔗 Multi-client deployments

Adapted a general platform to each client's business needs for smart airport and New Taipei City public-opinion monitoring projects.

Taiwan Mobile Co., Ltd.

UI/UX Designer

Oct 2013 - Jun 2017

🌈 myVideo OTT multi-platform interfaces

Designed mobile, web, and Chromecast interfaces, maintaining a consistent viewing experience and design language across device sizes and interaction modes.

Taiwan Mobile Co., Ltd.

UI/UX Designer

Oct 2013 - Jun 2017

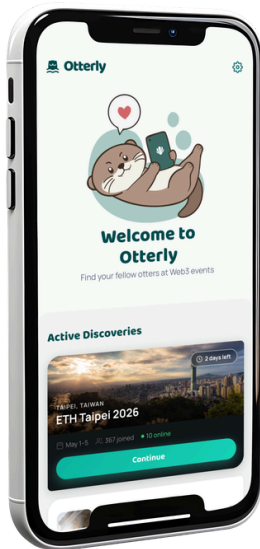

🌈 User testing & research

Ran A/B testing and usability testing on myVideo content placement to validate design decisions; supported an external research vendor during the myBook project by taking interview notes.

🌈 Established marketing design guidelines

From visual design principles to EDM templates, accelerating cross-team asset production.

PERSONAL PROJECT

Otterly

Telegram Mini App · Web3 Social

🐚 0-to-1 mobile-first product design

Independently planned product concept, user journey, gameplay mechanics, and interaction architecture for a Telegram Mini App.

🐚 AI-accelerated design workflow

Claude Code for agent prototyping, Claude for clickable prototypes, Google Stitch for UI iteration, ChatGPT + Jitter for character and animation production
